Theory	1
Case 1 – Steven-Johnson’s-Syndrome – Silica	5
Causes of Miasm	8
Case 2 – Proptosis left eye – Graphit	12
Case 3 – Retinitis pigmentosa – Fl-ac	14
Case 4 – Landau-Kleffner-Syndrome – Stramonium	15
03.03.2010 – Dr. Surmeet Singh Mavi	
Understanding of the remedy	18
Case 1 – Schizophrenia – Platina	19
Metal-Remedies	20
03.03.2010 – Dr. Prafull Vijayakar	
Case 5 – Neonatal respiratory distress – Arsenic / Phosphorus	24
Case 6 – Live-Case – Microcephalus, Cerebral palsy – Chamomilla	28
04.03.2010 – Dr. Anita Salunkhe	
How to approach psychiatric Cases	30
Case 1 – Depression – Antimonium-crudum	33
Case 2 – Schizophrenia – Agaricus	35
Case 3 – Panic – Crocus	37
Sensitivity goes to Syphilitic state – Sulphur	40
Case 4 – Hysteria – Nux-vomica	42
Case 5 – Insanity, sexual thoughts – Bufo	43
04.03.2010 – Dr. Prafull Vijayakar	
Case 7 – Aryepiglottic cyst – Staphysagria	44
Case 8 – Heamophilie – Crotalus-horridus / Phosphorus	46
Case 9 – Live-Case – Mental Retardation – Silica	47
05.03.2010 – Dr. Ambrish Vijayakar	
How to treat Asthma-Cases	50
Asthma – Differentiation of Rubrics and Remedies	51
05.03.2010 – Dr. Bandish Ambani	
Classification of the remedies	54
Case 1 – Hoarseness, Hypothyroidism – Carbo-animalis	56
Carbons – Differentiation	59
05.03.2010 – Dr. Prafull Vijayakar	
Case 10 – Live-Case – Rheumatoide Arthritis	62
Miasm in fever	65
06.03.2010 – Dr. Prafull Borkar	
Case 1 – Infertility – Mercurius	66
Female Infertility	69
Depression – Differentiation	71

06.03.2010 – Dr. Prafull Vijayakar

Miasm in Symptoms of Mind

75

Miasmatic aspects of Symptoms

77

Witty and quick-brained remedies – Differentiation

78

Case 11 – Brain-tumor – Sulphur

79

Case 12 – Live-Case – Psoriasis – Helleborus

81

07.03.2010 – Dr. Prafull Vijayakar

Camp “Hope for the Hopeless” – 62 short Cases

83-97

Example: A 400 yr. old Chinese was asked: What lasts longer, is more durable the hard or the soft? He said: look at my mouth all my hard things have left me, but my soft thing is still there (tongue).

Elastin excess:	Elastin less:
Contractures	Looseness
Constrictions	Relaxation
Stenosis	Ptosis
Shortening of tendons	Prolapsus
	Hernias
	Sprains

Fibrin excess:	Fibrin less:
Thickening	Dilatation
Indurations	Enlargement
Fibrosis	Hemorrhagic tendency
Toughening	

Elastin less starts in straining joints and can go right up to looseness of the valves.

§ 74

*Among chronic diseases we must still, alas!, reckon those so commonly met with, artificially produced in allopathic treatment by the prolonged use of violent heroic medicines in large and increasing doses, by the abuse of calomel, corrosive sublimate, mercurial ointment, nitrate of silver, iodine and its ointments, opium, valerian, cinchona bark and quinine, foxglove, prussic acid, sulphur and sulphuric acid, perennial purgatives¹, venesections, shedding streams of blood, leeches, issues, setons, etc., whereby the vital energy is sometimes weakened to an unmerciful extent, sometimes, if it do not succumb, gradually abnormally deranged (by each substance in a peculiar manner) in such a way that, in order to maintain life against these inimical and destructive attacks, it must produce a revolution in the organism, and either **deprive some part of its irritability and sensibility, or exalt these to an excessive degree, cause dilatation or contraction, relaxation or induration or even total destruction of certain parts,** and develop faulty organic alterations here and there in the interior or the exterior (cripple the body internally or externally), in order to preserve the organism from complete destruction of the life by the ever - renewed, hostile assaults of such destructive forces.²*

Emotion	Psora	Sycosis	Syphilis
Fear-Fright	Anxiety	Fears	Anguish, fearless, panic
Anger	Irritability	Anger	Rage
Happiness	Cheerfulness	1. Mirth/exaltation Exuberance High spirited, vivacious Jesting, laughing 2. Subtle or concealed laugh	Ecstasy, exhilaration; Happiness makes one ill, takes hold of the person, gets drunk;
Sadness	Grief, sadness, weeping;	Silent grief, brooding, dwells on sad things; sighing; sulking, discouraged, moaning;	Despair, delirium sad; hypochondriasis; Inconsolable, gloom;
Behavior	Straight forward	Mischievous, cunning Manipulative; Rationalization	Crooked Fatalist attack
Courage	Limited courage in known sphere ruled by intellect. Inhibition: careful; Timidity Want of confidence; Apprehensive; Anticipation;	Excess inhibition: cowardliness; Undercover; project as opp. rationalize	No inhibition; Misplaced inhibition and courage;

The one who excels is always syphilitic (killer-instinct) syphilitic is not always bad, we need also syphilitic people.

Case 2

Proptosis of left eye

Male, 70 yrs. – retired since 11 yrs. Used to work as assistant architect in BMC.

CC:

Proptosis left eye since 1-08

Diabetes mellitus since 11 yrs.

Thickening of lateral, inferior and medial recti muscles was diagnosed as cataract and age related macular degeneration by an ophthalmologist.

Left proptosis and extreme chemosis. He has taken treatment for swelling and redness and also steroids for 2 month but no relief.

Present complaints:

Swelling of left eye with lower eyelid.

Redness and watering of eyes especially while eating anything.

Very blurred vision esp. in the morning which becomes better in the evening. Haziness of vision, can see some person if sitting opposite but cannot recognize if it's a male or a female.

Pricking type of pain esp. on the lateral side of the eye ball.

Dull aching pain throughout the day < pressing;

Mild burning in the left eye.

7 days back he had two black dots in the left eye.

Imbalance while walking, vertigo, giddiness.

Dryness of foot since two months.

Past history:

In 2002 blockage in the coronary artery (angina?).

Physical generals:

App: prefers warm food

Thirsty

Chilly

ODP:

In 12-07 pain in the left temporal region and left orbital region without swelling of orbit – was given allopathic treatment.

Swelling of left orbital region with redness of eye.

Mind:

He has no children, stays with his wife.

Quiet person

Cannot tolerate contradiction, gets angry but suppresses his anger and stays quiet.

In 11-07 he had tension about society, as it was going to be redeveloped.

So he was tensed that where will he go then and what will he do? Says it had an impact on him. After redevelopment of property they will increase the maintenance, how will I cope up with it with my small pension. At that time he was a bit unhappy with redevelopment as the building was only 30 years old.

Today we are very happy with the facilities we have.

He is very timid and coward.

There was lots of hardship in childhood, had to study on his own.

He was working in Municipal Corporation. He was not satisfied with his income. He couldn't take risk of changing job from government to other private firm. He needed money as he has to feed his family first.

He was not averse to taking bribe, but never had courage to ask for it. If someone gave it, he did not mind taking it.

1997, 6 month before his retirement, he was tensed about his future.

In childhood had anger on contradiction, now also it is there, but he can control it.

Sensitive to criticism.

Very much anxious about everything.

Fear of light.

Fastidious

Consolation agg.

Family oriented

Sun gives vertigo;

Noise gives uneasy feeling

Beginning point:

Tension / anticipation about what will happen if the building will be build new

He is slow;

Left side is affected

Timid, coward, anger but not expressed – but will mock or be sarcastic. Money-minded;

Repertorisation:

	Ars	Carb-v	Graph	Lyc	Arg-n	Aur	Bin
EM	2	2	2	3	1	2	
ES	2	3	3	1			
IO	3	1	3	3	3	1	
IS	2	1	2	1	1	2	

TIMIDITY
 MOCKING sarcasm
 AILMENTS from anticipation.
 INFLAMMATION syphilitic

Ars – more restless, more anticipation health;

Lyc – hot,

Carb-v – right-sided

Graph – only left-sided carbon – (because of ferrum-element)

→ **Graph C 200** single-dose

FU:

Eye has to get better from above to downwards

After 2 month:

Eye is normal

He feels relaxed now

Carb-v	Graph.
Slowing of the systems (endoderm)	Anticipation
Slowing of GIT (bad odor of stools)	GIT (mesoderm)
Slowing Cardio-vascular (= Stasis)	Left-sided
Wants fan because lack of oxygen	More mind-affected
Right-sided	
No tumor	

If somebody makes the whole environment dull he has to be a carbon.

Opium – slow, contented, but sharp intellect – rightsided - courageous remedy

Basic Disposition:

Very important – and also if there is a change of disposition (does not fight anymore)

Close to her parents earlier – but after her marriage she did not talk to her parents

She tried to adjust to her other life (cooking for her husband) – but she is not able to adapt (nat-m would be able to)

Before she was a free bird – but now she is trapped in traditional live

Usually we go for what we feel is the emotion, is the remedy – but this is wrong - we should only take what is sure in a case;

As a child → free bird, self willed, boyish, pampered, introverted

As a young woman → joins the army, meets the boy and falls in love

After marriage → gets married against the wishes of parents, tuberculosis abdominal

Stress → In-laws want typical DIL

Sycosis → husband not supportive, loves husband – grief

Syphilis → Ectopic pregnancy, right tube excised

Syco-syphilitic → Stress +++, Depression - feels alone

→ depression – despair, secondary infertility

Syphilis → Desire to go away, hates people, leave everything, strong

Repertorisation:

	aur	puls	ars	lyc	stram	lach	merc	sulph	bar-c	rhus-t	sep
	4	4	4	4	4	4	4	4	4	4	4
	9	8	7	7	7	6	6	6	5	5	4
1 FORSAKEN feeling	3	3			2	2	2				
2 DESPAIR	3	2	3	3	2	2	2	3	2	2	
3 ESCAPE, attempts to			2		2						
4 MISANTHROPY	2	2		2							

Aurum metallicum in Depression:

- High expectations from self and others
- Offended easily
- Anger+, intolerance to contradiction
- Despair – everything is lost and self reproach – escape
- Lost and also that he has lost affection of friends

Pulsatilla in Depression:

- Mild timid, emotional selfish
- Craves sympathy
- Offended and discouraged very easily
- Forsaken feeling
- Desires many things, infinite, social position
- Anxious solicitude about his health and domestic affairs (like sepia)
- Envious, avaricious, dissatisfied, greedy, wants to have everything for himself
- Cross, takes everything in bad part what others say
- Everything disgusts him, everything is repugnant to him

Lachesis in Depression:

- Imagines he is followed by enemies who are trying to harm him; attempts to leave room as if frightened by vision behind him
- Quiet, sorrowful, lowness of spirits, amel. by sighing, repugnance to society and dislike to talk, solicitude about future, with disgust for life, inclination to doubt everything, mistrusts and misconstrues; indolence, aversion to every kind of labor and motion, melancholia;

Rhus-tox in Depression:

- Mild timid → forsaken feeling, despair and escaping from the bed as it drives him out of the bed
- Fear – as if about to hear a calamity; or feeling as if she were solitary and all around her were dead and silent; or feeling as if she has to bid farewell to an intimate friend;

Sepia and Mercurius (very close in this case)

- Positive
- Aversion to family members
- Company aversion to, solitude fond of
- Despair
- Hatred for persons who have offended him
- Frightened easily
- Misanthropy
- Consolation agg.

Difference

Sepia	Mercurius
Indifference to loved ones	Audacity
Aversion to husband	Aversion to all persons
Company aversion to, amel. when alone	Company aversion to, cannot bear anybody
Cares about domestic affairs	Forsaken feeling – sensation of isolation
Sadness about domestic affairs	Chaotic confused behavior
Stifled affections	Disobedience
Despair of social position	Remorse
	Squanders
	Wander and travel desire to
	Social inhibition lack of

1st understanding

- Mannish habits
- Hatred for those who have offended him
- Dancing desire for
- Forsaken feeling
- Dwells on past, disagreeable occurrences

Present understanding

- Disobedience
- Defiant
- Despair
- Escape attempts to
- Forsaken feeling, isolation sensation of
- Misanthropy

Case 5 FU

3 ½ yrs. old – VSD, mentally retarded
got first calc-ph – did not work

Then he got **magnesium-phos** 1 year before
never smiling (alum, lyc, ars, magnesium)
has to turn the head in order to see sharp

Case 6 FU

spastic of left arm and leg, fingers long and contracted
Convulsions

has been in school till 9th standard

Prafull asked specifically about 5th month of pregnancy (development of extremities)

got Sulph 3 month before

Now:

Convulsions are reduced, but hand and leg no improvement → this is like an allopathic action. Convulsions have to increase first (electrical discharge), hand has to become loose, then leg must be better, only then convulsions has to decrease.

Sulph was only partial remedy.

→ **Bar-sulph** (left sided)

In such cases syphilitic Miasm destroys modalities – we have to concentrate on physicals.

Case 7 FU

Boy 9 yrs. old – CP (cerebral palsy)

He got Arsenic 3 month before, spastic was better but back became not stronger. But this has to come first – otherwise it will never improve.

Laughs loud and intense when somebody teases him

= laughing immoderately

always smiling when getting up = cheerful (is not like arsenic)

cheerful = hyos, cann-i, other drugs

Mischievous trait, remembers things very well, has sharp brain and spasm in muscles

Opium would be more serious, not mischievous;

Hyos always incites others – this he doesn't do. He enjoys himself → **Cann-i**

Case 8 FU

Autism and CP

He got **Stramonium M** 3 month ago

Now:

Legs are better, he says "Thank you" when he left.
